

LEARN TO EXCEL WITH NumberNagar®

ADVERTORIAL

A holistic intervention

CHILDREN'S EXPERIENCE IN PRIMARY SCHOOL, BOTH ACADEMIC AND NON-ACADEMIC, LAYS THE FOUNDATION FOR OVERALL PERSONALITY DEVELOPMENT

NumberNagar® has been successfully achieved. The key parameters in making this partnership successful are below:

- The common goal of making a difference in children's learning - school management as well as NumberNagar® are firm on this.
 - The learning solution is creative and provides out-of-the box opportunities for both teachers and students.
 - The pillars of the school system - teachers - are trained as flag-bearers of implementation; they are not seen as adversaries.
 - Thorough need analysis and customisation of teacher training - address their needs and solve their problems - NumberNagar® does not follow a one-size-fits-all policy.
 - Continuous support at the back-end from NumberNagar® - a sense of partnership to make the implementation successful.
- NumberNagar® was integrated into Sri Sessaas in April 2015 and the partnership has been running successfully for four academic years with steady progress in performance. When well-

intentioned teams get together with a common goal, nothing is impossible. When that goal is the well-being of children, what more can one ask for!

FINDING A BALANCE

Creative interventions like NumberNagar® allow children to enjoy their learning experiences in a wholesome manner, instead of looking at academic work as a burden. Nurturing their curiosity and training them for life-long learning is the need of the hour.

NumberNagar® has operational Franchise centres in the following locations - Gubbalala, Sir M Vishweshwariah Layout, HSR Layout Sector 3, Sanjaynagar, Hulimavu, Kumaraswamy Layout, Rajarajeshwari Nagar in Bengaluru, and Magarpatta City in Pune. The goal is to grow organically to 25 centres in Bengaluru and 300 centres all over India over the next two years.

"The carefully planned and customised training programmes for the teachers helped us a lot. Pre-Activities and post activities given for each training session saved a lot of time and served better understanding. Relationship building activities have a good impact upon Teacher - Trainer, Teacher - Teacher, Teacher - Principal & Teacher - Student Relationship. The window-farm setting, visit to Kurumbapatty Zoo and a lotus blossom activity helped in building up good relationship as well as to strengthen the concepts."

— SAILAJA V
Principal, Sri Sessaas International Public School

"NumberNagar® is very good. Basically, we have so many outsourcing resources. But one thing that is unique about NumberNagar® is they gave a lot of support even after their implementation. There are so many teacher training, and the teacher support, and the teachers are tracked, and they are asked about what they are doing in the lab, and their time in the lab is measured, so many things are happening."

It was the team which convinced me to take up NumberNagar®. Actually, this team is a dedicated team who wants to make a difference. That's what is inspiring about them. Yes, NumberNagar®'s impact is very good in Maths, especially in Maths. Because Maths had always been a problem with our school. But after NumberNagar® there is a lot of change especially at thinking skills and creativity. It has helped the children to do well not only in academics but everywhere. So, we are very happy that NumberNagar® has made an impact with the kids and it is fun. So, children love to go to the lab and perform and do things. So NumberNagar® has made a great impact on our children.

— AMARJOTHI BALASUBRAMANIAN
Founder Trustee, Sri Sessaas International Public School

Primary school education plays a significant role in shaping a child's future and personality. Children's experiences in primary school, both academic and non-academic, lay the foundation for overall personality development. It is, therefore, imperative that their school experience is meaningful and fulfilling.

The main-stream school system in our country faces many challenges in providing a holistically meaningful experience to all children.

The emphasis on comparative academic performance and the need to cater to large groups of children makes it difficult for every child to benefit fairly in the system.

Laying emphasis on learning experience implies personalisation because an experience is unique to the learner. To effectively achieve personalisation in a traditional school system is a huge challenge. In this direction, creative interventions such as NumberNagar® play an important role, when effectively supported by school management.

NUMBERNAGAR® INTEGRATION INTO SCHOOLS

NumberNagar® is India's first Blended Learning Solution for Maths, English and Science. It has been researched, designed and created in India, for children of age group 5 to 14 years, to excel conceptually and academically. It has been designed to serve the dual purpose of functioning in an existing school system as well as outside it as an after-school learning centre.

Integrating any independent educational solution in an existing school system is challenging

because of the number and nature of stakeholders. Any solution should benefit children, teachers, parents and school management simultaneously while offering different value propositions to each of these set of individuals. This is a tall order indeed; however, it is not impossible to achieve

In this direction, Sri Sessaas International Public School, Salem has been the harbinger of progressive thinking. Under the able guidance of the management team at Sri Sessaas, the Herculean task of collaborative partnership between the school and
